

OETTINGER Golf 400R sees its world premiere at the Essen Motor Show 2017 as TUNE IT! SAFE! police car

Clear the stage for the Golf R police edition: TUNE IT! SAFE! turns cult-status power pack into potent super sports car

Striking appearance for a stunning Golf – clear the stage for the police edition of the VW Golf R. For the Essen Motor Show 2017, TUNE IT! SAFE! has turned a cult-status power pack into a road-safe super sports car. The base car¹, which was provided by Volkswagen R, was tuned into the new TUNE IT! SAFE! campaign car by OETTINGER tuning specialists. Representing the initiative sponsored by the Federal Ministry of Transport, the Association of Automobile Tuners (VDAT), premium tyre manufacturer Hankook and numerous other organisations and institutions, the campaign vehicle sees its world premiere at the Essen Motor Show (Hall 10, Stand E106) as the new eyecatcher.

The TUNE IT! SAFE! police car is the best example of why customised, creative automobile tuning and road safety do not have to be mutually exclusive. The Golf R is already a striking car in standard Volkswagen R configuration. Extensive tuning measures have now turned into an unmistakable gem. The OETTINGER Golf 400R is a true stunner featuring an aerodynamics kit, which consists of front spoiler with splitter, side sills, rear apron set and roof spoiler plus a distinctive engine hood. Another sight to behold is the sports exhaust system with its 90 mm diameter, 4-pipe silencer. Its inner values are equally impressive. OETTINGER has increased output from the standard 310 to 400 hp (294 kW), making the sports Golf sprint from 0 to 100 km/h in approx. only 3.6 seconds. The top speed is 290 km/h. Visitors to the Essen Motor Show can admire the new TUNE IT! SAFE! campaign car from 1 to 10 December 2017 in hall 10, at stand E 106.

“Ventus S1 evo” high-performance premium tyre by Hankook

The striking OETTINGER RXX 8.5 x 20 ET 45 wheels are naturally equipped with Hankook premium tyres. The high-performance 235/30 ZR20 “Ventus S1 evo” tyres are mounted both on the front and rear axle. The luxury-class, ultra-high-performance tyres provide highest-level safety as well as outstanding performance. They strike the ideal balance between wet and dry behaviour at high and extremely high speeds. A high-performance braking system was installed on the front axle to ensure safe and powerful deceleration from the top speed of 290 km/h.

Signal system and official decor for an authentic police car

The official police decor makes the TUNE IT! SAFE! campaign car a truly unique specimen. The police outfit (blue and yellow film for the first time) was fitted once again by FOLIATEC.com in high-precision style. A further striking feature are the so-called LugNuzCovers, which FOLIATEC.com provided for all the wheels. Hella once again provided the original “RTK7” police signal system and flashing beacons to give the car the true police look.

Brand new TUNE IT! SAFE! magazine with a total of 64 pages

The initiative for safe tuning has tuned not just its campaign vehicle but also the TUNE IT! SAFE! magazine. The brand new edition boasts an impressive 64 pages of diverse stories, important tuning tips and new products for automobile enthusiasts. Visitors to the trade fair stand can also look forward to expert advice, a special service provided by the KBA (Federal Office for Motor Vehicles) and a competition with attractive prizes. On all trade fair days there will be experts from various inspection and monitoring organisations, VDAT and also the North-Rhine Westphalia police to provide individual advice. And the Federal Office for Motor Vehicles (KBA) can inform visitors of their driving licence 'point score' in Flensburg on presentation of ID.

TUNE IT! SAFE! – the safe tuning initiative

The TUNE IT! SAFE! initiative was brought into being in 2005 in order to show that creatively appealing tuning and legal provisions are by no means a contradiction. The initiative is supported by BMVI (Federal Ministry for Transport and Digital Infrastructure), Hankook Tyres Germany, VDAT (Association of Automobile Tuners), ADAC (German Automobile Association), AvD (Automobile Club of Germany), BRV (Federal Association of the Tyre and Vulcanisation Trade), DVR (Germany Road Safety Council), DEKRA vehicle inspection, the Essen Motor Show, the “Take Care on the Road” (Gib acht im Verkehr) initiative, GTÜ (Technical Inspection Association), KBA (Federal Office for Motor Vehicles), the police of North-Rhine Westphalia, TÜV Rhineland (German Technical Inspection Association), DSK (German Sports Driver Circle), KÜS (Motor Vehicle Inspection Organisation of Independent Motor Vehicle Experts) and ZDK (Central Association of the Germany Motor Vehicle Trade).

For more information go to www.tune-it-safe.de and www.facebook.com/tune.it.safe. The virtual expert, Mr. Safe T, will answer your questions on the topic of safe tuning competently and around the clock on the website.
